Digital Assistant in Class: **Statement**

From: “human – computer interaction”

Stuart K. Card, Allen Newell, and Thomas P. Moran. 1983, *The Psychology of Human–Computer Interaction*.

Unlike other tools with specific and limited uses, computers have many uses which often involve an open-ended dialogue between the user and the computer.

Suchman, Lucy (1987). *Plans and Situated Action. The Problem of Human-Machine Communication*. New York, Cambridge: Cambridge University Press.

To: “human – machine communication”.

Machine to human combination is **a form of communication in which humans co-work with Artificial Intelligence (AI) systems and other machines as opposed to utilizing them as tools or devices.**

Andrea L. Guzman (2017). *Human-Machine Communication, Rethinking Communication, Technology, and Ourselves*. (Volume editor) TextbookXX, Media and Communication, Series: Digital Formations.

Inspire a new generation of Leaders

Digital Assistants in class: **Significance**

Combined sources in class: teacher and digital assistant

- Adapt to individual student needs
- Provide Personalized learning experiences
- Enhanced engagement
- Data-driven insights
- Access to information
- Future-ready skills

Digital Assistants in class: **Significance**

Why to incorporate a digital assistant in class?

- Every student who is now at school will work, interact and communicate with a “machine” (AI, robot, IoT cyborg, etc.)
- It’s a popular application of AI - part of our everyday life
- Measurable
- Value for money school project
- Easy to use even without IT background
- Attractive to students

Digital Assistants in class: **Key points of integration**

Alexa our new friend in class

- Design of lesson plans
- 8 weeks learning plans within the EFL class for the 2nd grade of High School students
- Introduce Alexa as the class new friend and assistant
- Allow students to interact
- Surprise but also curiosity among class members

Integration process in 7 steps

1. Define Needs
2. Determine Goals
3. Choose an
Appropriate Digital
Assistant
4. Organize Teacher
Training
5. Piloting
6. Integration
7. Evaluate Findings

1. Do you consider AI assistants as a key tool in order to enhance learning plans?

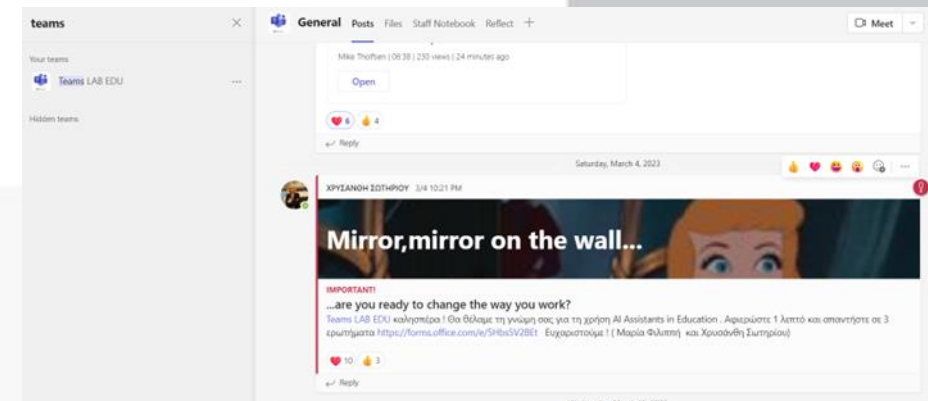

More Details

Insights

- Yes 100
- No 2
- Maybe 7

2. Have you ever used a Digital Assistant in your classroom or work environment?

Lessons learned

- Students were surprised but also happy to have Alexa in class
- They were competing Alexa
- They were trying to find mistakes
- They were trying to find questions Alexa couldn't answer
- They were polite
- They were asking for Alexa to be there everyday in class

Challenges

- Technical Reliability and Accessibility
- Bias and Ethical Concerns

Conclusions

Mentimeter

Conclusions...

A close-up photograph of a paintbrush with a wooden handle and dark bristles, resting on a surface of thick, textured blue paint. The background is a soft-focus, colorful abstract painting with shades of purple, yellow, and blue. The text is overlaid in white, sans-serif font, centered on the image.

AI-powered Digital Assistants are
like a paintbrush, it's up to us to
decide whether we want to paint a
masterpiece or a mess.
